

## Bi-directional Overspeed Governor OX-240F

### Specification:

|                                                |                  |
|------------------------------------------------|------------------|
| Rated speed                                    | ≤1.75m/s         |
| Wire rope diameter                             | φ6mm,φ6.3mm,φ8mm |
| Sheave diameter                                | φ240mm           |
| Tension force                                  | ≥1000N           |
| Super switch voltage grade                     | AC220V           |
| Using with the magnetic rope gripper of OX-250 |                  |

### Installation Dimension:
